***Shower Glass Doors,
Screens & Enclosures***

Product Brochure 2022/2023

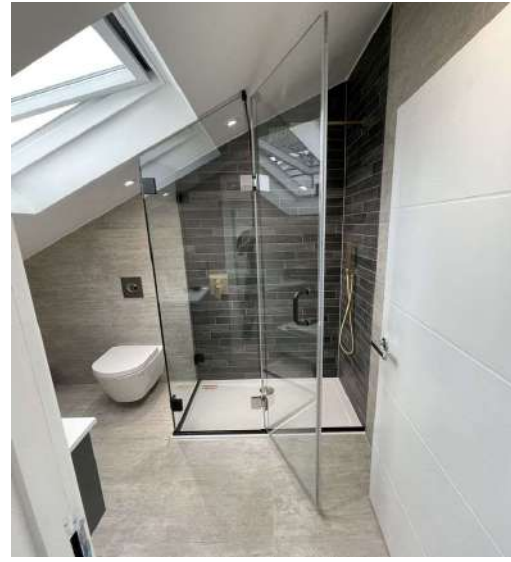

We supply and fit bespoke shower glass for doors, screens and enclosures to suit every project for both domestic and commercial solutions. Made to measure to suit any shape, or size and with a vast support to styles and fixings.

Our shower screens and shower enclosures are made from high-quality low iron glass to provide superior clarity and a higher quality finish, with a extensive range of fixtures and fittings, giving you the complete freedom of design.

A frame-less shower is simple, refined and purely beautiful. Made of glass, it is transparent so it doesn't interfere with any style and should privacy be an issue, then a post effect can be applied to the glass.

Additionally, frameless glass shower enclosures used in small bathrooms will make it look optically bigger, especially when the floor tiles are monochromatic. Glass shower enclosures will also add a lot to the style, enhancing even the most modest and minimalistic design concepts with their shine and flawless elegance.

Quality without compromise is our mission objective when it comes to our bespoke showers. We take immense pride in ensuring the best product is produced to suit the bathroom, to enhance both aesthetics and functionality.

Our bespoke shower glass can be further customised by applying different types of finish on the glass, such as tinted, or Satin (frosted for privacy), or even bespoke vinyl or sandblast designs. Additionally, many of the fixings come in an extensive array of finishes such as brass, antique bronze and black, not just chrome or brushed steel.

Why not visit our website and view the Shower Glass Photo Gallery to assist with ideas for your shower and to see the various types of shower glass, screens, doors and enclosures we have manufactured and install over the years.

No matter whether your shower glass requirement is small or large (simple screen to full enclosure). Rest assured that with over 15 years' experience in manufacturing these products and installing them we have you covered.
