Beautiful Glass Splashbacks

Product Brochure 2022/2023

Beautiful glass splashbacks made bespoke for commercial and domestic customers alike. Produced from quality materials to provide an elegant upgrade to any Kitchen, Utility or Bathroom area.

We have been manufacturing Splashbacks for over 15 years and are well known across London and Surrey as one of the leading Splashback manufacturers. All of our Splashbacks are made to measure, meaning they fit even the oddest or complex shaped areas.

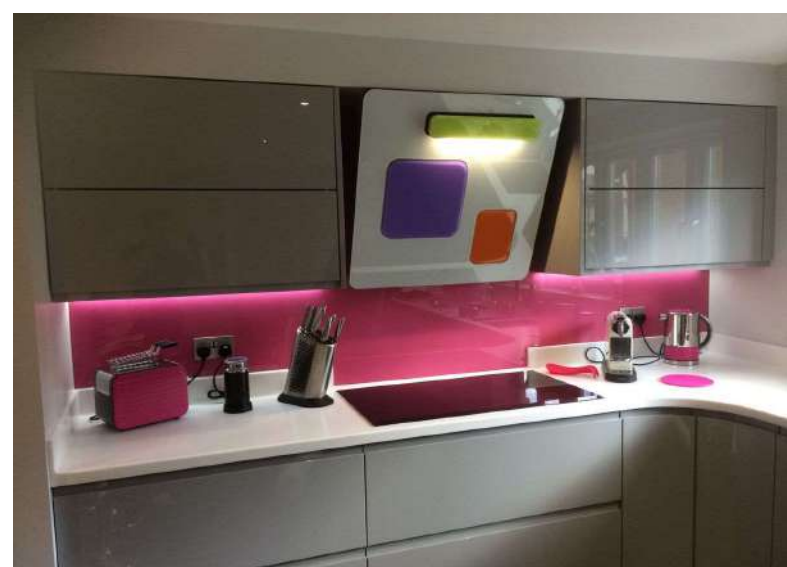

We offer 3 types of Splashbacks, which are:

- Back painted: Limitless options, providing an extensive range of colours, which also include metallic, sparkle and speckled paint.
- Back printed: Using high quality images to offer a further extensive range or true imagery to enhance the splashback look.
- Mirrored: Hand silvered & processed toughened mirrored, tinted mirrored and antique mirrored splashbacks for a true elegant option.

Glass splashbacks are the ultimate replacement/ alternative to kitchen and bathroom tiles. With no lines to worry about, glass splashbacks not only look seamlessly beautiful, they also stay clean and hygienic longer.

As one of Surrey's leading suppliers of glass splashbacks. With a full template and installation service available, we can handle your design requirements from start to finish, providing you with a stress-free experience and completely flexible service.

As with any batch manufactured item, there is always a chance of slight colour variation in the manufacturing of the paint. Additionally, placement, light affects and source may also cause the colour to look different and therefore samples should always be considered prior to deciding the colour.

Here is a prime example of colour change resulting from the effect of differing light sources and enclosed shaded areas:

1. Shows an area in an enclosed corner where there is next to no natural light source, resulting in a darker appearance of the colour applied to the splashback.
2. Shows an area exposed to natural and artificial light, resulting in a lighter colour, as opposed to section 1.
3. Shows an area fully exposed to natural light (as a result of the glass bend), resulting in splashbacks lightest colour.

Glass splashbacks provide architects, builders, designers and homeowners a glass product that is extremely flexible to work with, which is ideal for kitchens and bathrooms. Splashbacks are available using between 6-19 mm thickness glass and toughened to BS6206 (Class A).

Printed glass splashbacks whilst being a fairly new option for this product offers a unique and ever more extensive range of options to both commercial and domestic customers. Using a high quality image there is no limit to the options available, from liquid crystal designs, to beautiful vistas. These splashbacks enhance any splashback like no other and can bring a personal touch to the end result.

Toughened mirrors are new to the glass range options as normal mirrored glass cannot be toughened, the process is a specialist option available from only a limited number of companies within the country. The glass is hand silvered and if antique mirror is required then hand antiqued as well, making it a perfect option for Splashbacks.

Toughened mirror is available in standard silver, tinted (bronze/grey) silver and of course Antique silver, the antique range currently has 10 different designs available on our website to choose from each providing a unique and elegant finish to any Kitchen or mirrored area.

More examples of how Splashbacks can make your kitchen look amazing.
